Children in households receiving rental assistance are less likely to miss school for health reasons and have a <u>lower risk of health problems</u>, especially severe health events, than their counterparts in unaffordable or poorquality housing.

Source: Fenelon, A., Boudreaux, M., Slopen, N., & Newman, S.J. (2021) The Benefits of Rental Assistance for Children's Health and School Attendance in the United States. *Demography.* 58(4), 1171-1195. <u>https://doi.org/10.1215/00703370-9305166</u>

Secure, stable, well-located housing in good condition is linked to better <u>health and well-being</u>. Housing problems and unaffordability are <u>connected</u> to a wide range of health risks and negative outcomes, including: difficulty leaving domestic violence situations, chronic illness, high blood pressure, depression, anxiety, psychological distress, heart disease, asthma, lead poisoning, postponing medical care and more frequent hospitalization.
